

## Coral Spawning Predictions

## **TO OBSERVE SPAWNING:**

- · Make multiple dives.
- Dive in a place with high coral cover.
- Do not dive deeper than 50ft to maximize bottom time.
- Use a moderately bright dive light.
- Make sure you have good buoyancy control before going on a coral spawning night dive.
- Make sure you are familiar with the dive site chosen for coral spawning by diving it during the day
- Marine Park Rules apply at all times, DON'T TOUCH, DON'T TAKE, DON'T BRAKE

Buddy Dive cannot guarantee coral spawning based on these predictions.

## **LEGEND:**

Days AFM: Days After the Full Moon min BS = Minutes Before Sunset min AS = Minutes After Sunset

- Gray with ?: Spawning is unlikely but possible (This species is understudied for these dates and times. Additional observations during these windows are highly encouraged!)
- Yellow: Spawning is possible
- Blue: Spawning is likely
- Orange: Spawning is very likely

## Get the most out of your dive!

Ask one of our Dive Guides to join you on a night dive. For availability and prices visit the diveshop or email our reservations team on <a href="mailto:reservations@buddydive.com">reservations@buddydive.com</a> Night diving experience is required.
